SAWABA ABID

Computer Science Graduate | Technology Roles
+92 343 4702811 | sawabaabid1@gmail.com | LinkedIn | Portfolio | Lahore, Pakistan

PROFESSIONAL PROFILE

Motivated and detail-oriented Computer Science graduate with a CGPA of 3.52 and hands-on experience developing mobile applications, web solutions, databases, and real-time systems. Strong foundation in programming, data structures, authentication, and APIs, with a genuine interest in graduate trainee, information technology, and application support roles. A quick learner who is customer-focused and ready to contribute in a professional, process-driven environment.

CORE COMPETENCIES

Programming: C++, Python, JavaScript, HTML/CSS
Application Development: React Native, Node.js
Backend & APIs: Express.js, Socket.io, Stripe API
Databases: SQL, MongoDB Atlas, Firebase
Security & Access: Firebase Authentication, Role-Based Access Control
Tools & Deployment: Git, VS Code, Vercel, MS Word, MS Excel

EDUCATION

Bachelor of Science in Computer Science — CGPA 3.52 | University of Gujrat, Gujrat, Pakistan | Completed June 2026

Associate Degree in Computer Science — CGPA 3.74 | University of Central Punjab, Lahore, Pakistan | August 2024

Intermediate in Computer Science (ICS) | Superior College, Muridke, Pakistan | April 2022

MY PROJECTS

Brain Disease Detector — Final Year Project

- Developed a React Native Android application for AI-based neurological disease pre-screening.
- Trained CNN models using TensorFlow.js, achieving 87.3% accuracy for Alzheimer detection and 89.1% for brain-tumor classification.
- Integrated real-time doctor–patient chat with Socket.io, Stripe payments, PMDC-verified doctor registration, and role-based dashboards.
- Built the backend with Node.js/Express, MongoDB Atlas, and Firebase Authentication.

Clothing Brand Website — Full-Stack Project

- Developed a complete website for a clothing brand, handling both frontend and backend development.
- Built the frontend with HTML, CSS, and JavaScript.
- Built the backend with Node.js and used MongoDB as the database.

Expense Tracker — Web Application

- Developed a web-based expense tracker application for recording and managing expenses.
- Built the frontend with HTML, CSS, and JavaScript and the backend with PHP.

Coffee Shop Website & Tic-Tac-Toe Game

- Created a responsive HTML/CSS/JavaScript website with navigation, product listings, galleries, and forms.
- Developed a validated two-player C++ console game using functions, loops, and conditional logic.

INTERNSHIP & CERTIFICATES

- Internship at SDMC — University of Gujrat
- Introduction to Cyber Security Essentials
- NAVTTC Course in Artificial Intelligence (AI) — In Progress

ACHIEVEMENTS

- Completed BSCS with a CGPA of 3.52.
- Achieved 87.3% accuracy in Alzheimer detection and 89.1% in brain-tumor classification for Final Year Project.
